The SPECTROBLUE delivers best-of-class ICP-OES performance. Customers value its outstanding reliability and analytical performance. However, preserving these qualities throughout its entire operating life isn’t possible without proper maintenance. That the breakdown risk for an analytical instrument increases with time is known, but only you can say what a breakdown will cost you. It could have wide-reaching consequences:

Take advantage of the possibility to maintain SPECTROBLUE’s out of the box performance, while reducing the risk of costly breakdowns, with regular performance maintenance inspections within the framework of SPECTRO’s AMECARE Performance Services. Based on your needs and circumstances, an individual maintenance plan is created, reflecting your quality compliance requirements and risk management strategies. The rest is automatic. Appointments for scheduled inspections are made and the work conducted; all required maintenance and preventative measures will be carried out by authorized, factory trained and certified, service engineers that are backed by a best-of-class worldwide factory support infrastructure. The correct working order of the instrument is documented with a certificate and a test seal affixed to the instrument. The lifetime of the instrument is extended and your quality compliance documented.

SPECTRO’s Performance Maintenance is a guarantee for the long-term preservation of the value and performance of your SPECTROBLUE.

Experience shows that, without proper maintenance, the likelihood of a breakdown increases exponentially with the age of an instrument. Regular maintenance drastically decreases this risk and extends the life of the instrument.

On top of the costs to repair the instrument, the instrument being unavailable may mean that you have increased material costs, lower, or no, sample throughput, missed deadlines and, ultimately, you may face decreased revenues and profitability.
SPECTROBLUE Performance Maintenance

ISO-conforming maintenance to prevent avertable instrument breakdown
Assurance of long-term analytical performance
Factory approved testing seal visibly affixed to the instrument for ISO audit compliance
Detailed inspection certificate with professional assessment of all important components

You also profit from the following additional services:
Priority support and response times
Discounts on replacement parts and service for the time between agreed upon inspections
System backup and all necessary software updates

A SPECTROBLUE Performance Maintenance inspection includes, but is not limited to, the following:

Initial Instrument Status Evaluation
A general examination of the instrument’s components and functions.

General Maintenance
Cleaning of the OPI/SPI and primary optical components, data backup of the instrument software and measurement results, installation of any instrument software updates if required.

Measurements
Main voltage, argon gas flows and voltage supply, optic temperature and pressure, analytical performance.

Replacement of parts and components
Replacement of filters & seals. Primary optical components and UV-Plus purifier replaced as required.

Determination of the time for the next inspection

Available for
SPECTROBLUE FME16
SPECTROBLUE FMS16
SPECTROBLUE FME26
SPECTROBLUE FMS26
SPECTROBLUE FMT26
SPECTROBLUE FME36
SPECTROBLUE FMS36
SPECTROBLUE FMT36

AMECARE PERFORMANCE SERVICES

Ensuring peak performance and maximum return on investment over the life of your equipment.

We will deliver this by:
- Actively maintaining your equipment to maximize availability
- Optimizing solutions to meet your unique applications.
- Enhancing user skills by providing access to product and application experts.
